

This is concerning the NAB's petition 04-160 I respectfully ask that you leave the Traffic and Weather channels alone and let them remain on xmradio. I am a truck driver and run team with my husband, there are so many times that the weather and traffic channel have save us time and probably our lives. By being able to know in advance what you are going into you're not as apt to get into a long traffic tie-up or maybe even run into a bad storm that might even take your life, or cause you to wreck and take someone's else's life. Please leave things as they are. We pay for these services and no-one else should have the right to take them away from us. If other broadcasters don't like what xmradio is doing then why don't they improve their services to better serve the listening public?
